State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Presidential Major Disaster Declaration

On 01/02/18, the Federal Emergency Management Agency (FEMA) announced that federal disaster assistance has been made available to the State of California via Major Disaster Declaration FEMA-DR-4353, to supplement recovery efforts in the areas affected by the December 2017 Wildfires. To date, the declaration includes Ventura and Santa Barbara Counties, and the incident period begins on 12/04/17. Public Assistance has been granted.

Cal OES COASTAL REGION

Earthquake, Berkeley, Alameda County

On 01/04/18 at 0239 hours, a magnitude 4.4 earthquake occurred near Berkeley, Alameda County. The National Tsunami Warning Center (NTWC) issued a Tsunami Information Statement advising there was no tsunami danger for California.

- Alameda County, as well as the surrounding Bay Area counties, felt the earthquake.
- There were no reports of damage or injuries.
- The California State Warning Center made notifications per SOP.

Per the Cal OES Earthquake and Tsunami Program Duty Officer (EQTP-DO) as of 01/04/18 at 0423 hours:

- Bay Area Rapid Transit (BART) has issued a service advisory and will be performing track inspections. Delays can be expected.

Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

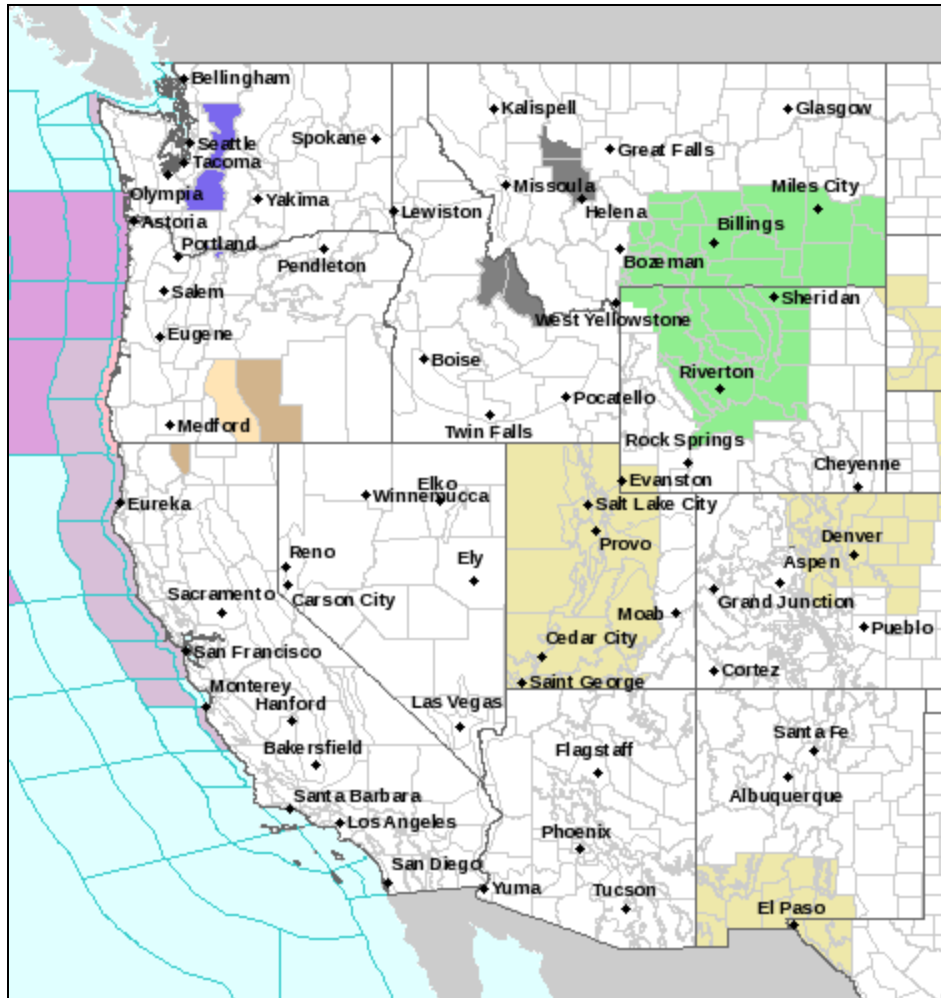

A closed low pressure area west of central CA is pushing warm, moist and unstable air into the region from the south. Rain will increase over the region and continue into early Saturday. Snow levels will be 6000 feet in the north and 7000 feet in the south through today, then drop to 5000-6000 feet Friday and 4000-5000 feet Friday evening and early Saturday. SE-SW winds will gust to 25-40 mph late today through Friday with the strongest winds along and east of the Cascade-Sierra crest, including the Shasta Valley and Weed.

Late Saturday and early Sunday will be mostly dry, but another system passing to our north will bring isolated to scattered rain showers to our northern areas late Sunday into Monday. A third system will impact Northern California Tuesday and Wednesday with rain and high elevation snow, and a fourth is expected late in the week. Rainfall equivalent totals through early next week will range from near 0.50 inches in the driest inland valleys to 2-5 inches or more in the mountains from the Cascade-Sierra crest west.

SOUTHERN CALIFORNIA

The main weather story going forward will be the change to a cooler and wetter pattern over the next week. A cooling trend is expected over the next few days, and by Friday, highs should return to near normal. A second system will arrive Friday, bringing a better chance of light rain to the Sierra Foothills with light snow accumulations above 7,500 feet. Another half of precipitation will be possible Friday along the central coast and Sierras north of Fresno County. Gusty winds of 20-30 mph will be possible in the Sierras and desert Friday night and Saturday. After a cooler weekend, the last system may bring wetting rain to many areas around next Tuesday. No strong offshore winds are expected the next 7-10 days.
